

set\_real\_power\_state

```
graph LR; A[set_real_power_state] --> B[get_gconf_int]; A --> C[init_wreq]
```

The diagram illustrates a function call sequence. A central box labeled 'set\_real\_power\_state' has two outgoing arrows. The top arrow points to a box labeled 'get\_gconf\_int', and the bottom arrow points to a box labeled 'init\_wreq'.

get\_gconf\_int

init\_wreq
